-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2833

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 8, 2004 has been entered.

2. The disclosure is objected to because page 9, line 17, etc. refers to fig. 10D, which is not presently found in the application. In addition, on page 9, line 22 it appears that "of" should be deleted. Further, on line 23 of page 9, it appears that -the- should be inserted before "left." Appropriate corrections are required.

3. The drawings are objected to because Figs. 5B and 5C should show three rows of lower terminals in order to be consistent with Fig. 4 and the specification.

Applicant is kindly requested to consider placing the figures on the sheets so that they may be easily viewed with the pages in a vertical orientation.

4. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified

Art Unit: 2833

and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. Claims 11-20 are objected to because of the following informalities:

- The last section of claim 11 is redundant, repeating portions of claim 21 from which it depends.

- Claim 15 lacks antecedent basis for "said transmission cable" on line 1.

- Claim 20 lacks antecedent basis for "said shield portion," "said twisted shield cable" and "said ground plate" on lines 1-2.

Appropriate correction is required.

6. Applicant is reminded that a series of singular dependent claims is permissible in which a dependent claim refers to a preceding claim which, in turn, refers to another preceding claim. A claim which depends from a dependent claim should not be separated by any claim which does not also depend from said dependent claim.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 21, 11-13 and 16-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Fogg, et al. This connector comprises an insulator 2 holding plural contacts. The contacts are arranged in two row 6 at one end and three rows 13, 14 at the other end as claimed. It is noted that the placement of a contact and its arrangement at the apex of an isosceles triangles is determined

Art Unit: 2833

by the central axis of the contact arm. In regard to claim 11, it is noted that Fogg is intended to improve on known connectors for transmitting differential pair signals (column 2, lines 20-24 and 44-47) and therefore comprises a plurality of + and - signal contacts.

9. Claims 14, 15 and 19 would be allowable if rewritten to overcome the objections set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

10. Any response to this action may be mailed to:

Commissioner for Patents
